

MAINTENANCE INSTRUCTIONS

The cleaning method is basically identical for any type and size of project.
The equipment needed depends on the size of the surface to be cleaned.

SPOT CLEANING

Remove stains as soon as possible to avoid spreading and setting of the dirt.

Paint

- ✓ Water or white spirit

Chewing gum

- ✓ Hot steam or freeze spray

Oily / greasy stains

- ✓ Hot soapy water

Red fruits

- ✓ Water

Plaster / Aureoles

- ✓ Vinegar and hot water

Blood

- ✓ Saline solution or diluted ammonia

Hot drinks

- ✓ Hot water

Cold drinks

- ✓ Water

Food

- ✓ Soapy water

Marks from shoes

- ✓ Rub with dry cloth

WHOLE SURFACE

Daily maintenance

2tec2 just needs to be regularly vacuumed like any other carpet. A vacuum cleaner with a vertically rotating brush that loosens the dirt and removes it at the same time is a plus.

Periodic deep cleaning

Depending on the level of traffic, 2tec2 may need a deeper cleaning (with water). A deep cleaning is usually done once a year. The choice of equipment depends on the size to be treated.

Small surfaces (< 50 m²)

Use a mop or brush to loosen the dirt. Rinse with plenty of water and remove the dirty water with an adapted vacuum cleaner.

Large surfaces (> 50 m²)

Use a floor scrubber-drier machine with vertically rotating brushes. These machines exist in different sizes and cost between 400 € and 2500 €. They clean and dry the flooring in one single operation with a perfect and quick result.

Difficult stains? First spray or sprinkle water eventually mixed with non-foaming vinyl cleaner on the surface, and wait for 5 minutes before using the scrubber-drier machine and repeat the cleaning operation.

You may

- Use plenty of water during cleaning. 2tec2 is waterproof
- Add vinyl cleaner PH 6 to 8,5 to the water for thorough cleaning
- Mix vinegar to the water [especially for cleaning plaster residues]
- Use diluted ammonia and White Spirit

Do not use

- Horizontal rotating brushes. This may not remove the dirt
- Foaming detergent
- Acetone
- Scouring pads
- Temperatures above 100°C for more than 5 minutes

Machine recommendations

Daily cleaning

- Wet & dry vacuum cleaner (type NT 27/1 Adv, Kärcher)
- Steam pressure machine (type SG 4/4, Kärcher)
- Vacuum Cleaner with vertical rotating brushes (type CV 38/1, Kärcher)

Deep cleaning

- Water injection-extraction, vertical rotating brushes :
- Duplex cleaning machine (type Duplex 420)
- Compact floor scrubber drier (type LavorPro Sprinter)
